magic

THREAD, COLOR, IMAGINATION –
METTLER THREADS MAKE
YOUR

sewing dreams
COME TRUE.

Mettler offers a large selection of threads in the best processing quality for all requirements and demands. Find your style in the wide variety of impressive colors and let your imagination take flight - because Mettler threads offer endless application possibilities for all creative minds! Also, discover the large selection of appealing kits and thread cases.

The history of today's internationally active manufacturer of high-quality sewing and embroidery threads began in 1883 in Switzerland, when the Mettler brand was founded. Many years later - in Germany and as part of the Amann Group - the sewing thread manufacturer established itself as a force to be reckoned within the world of threads.

Today, the company supplies more than 30 countries with high-quality threads for a wide variety of applications: whether for sewing, embroidery, quilting or serging - the large selection of synthetic and natural threads in various colors, lengths, and strengths appeals to commercial and industrial customers as well as end consumers worldwide.

SEWING

Threads that set your
imagination free.

The wide range of different threads in a variety of colors, surfaces, looks, and effects allows the realization of all creative projects. The high quality and excellent sewability of the threads guarantee long-lasting results that impress.

QUILTING

Quilt creations
that bear your signature.

New contrasts, color combinations and effects - with sewing threads from Mettler, everyone can find their very own style when quilting. The cotton threads are extremely tear-resistant and glide effortlessly through even firm layers of fabric - by machine or by hand.

EMBROIDERY

Embroidery is the window
to your imagination.

Discover a blaze of color that will bring your embroidery fantasies to life! Our embroidery threads not only score with an extraordinary range of brilliant colors, but they also impress with better elongation, exceptional tensile strength and extreme resilience.

SERGING

Serging - assembling
what belongs together.

Our specialists among the sewing threads for serging master serger stitches with ease. For outstanding filigree seams, the following applies: if you want to sew evenly, trouble-free and resiliently, you are exactly right with the fine and tearproof serger threads from Mettler.

METROSENE® /CORDONNET 100% polyester

The perfect all-rounder

The all-purpose sewing thread METROSENE is the all-rounder from Mettler, which effortlessly masters all types of fabrics and stitches. From cotton, synthetic and mixed fabrics to linen and silk - the excellent sewability and high quality of this sewing thread are optimal in every aspect. Thanks to an impressive selection of stunningly intense colors that shimmer with a silky gloss, there are no limits to your imagination. Its tearproof and abrasion-resistant properties make METROSENE a reliable partner for all your creations.

EXTRA STRONG 100% polyester

Extra strong for highest stress

EXTRA STRONG is the perfect thread when it comes to seams that have to withstand any levels of stress. It is a strong, tear and abrasion-resistant thread, which can be used for both hand and machine sewing. Decorative topstitching seams also work extremely well with this thread. Whether for leather, denim or button work - EXTRA STRONG holds together what belongs together; and that for years.

SERACYCLE® 100% recycled polyester made of PET bottles

Thinking about tomorrow today

The recycled sewing thread SERACYCLE made from 100% post-consumer recycled PET bottles is the ideal all-rounder for creating all kinds of resource-conscious sewing projects – all in the usual Mettler quality! To meet the highest strength requirements for SERACYCLE, we exclusively use transparent PET bottles for the production of high-strength filaments. This guarantees the highest product quality. SERACYCLE's spool body is also made of 100% recycled PS so that the entire article is based on environmentally friendly materials. SERACYCLE can be perfectly sewn on all types of fabrics and impresses with its optimal abrasion resistance and tear strength. The construction of the core thread guarantees a supple textile look with excellent elongation. The thread is colorfast, iron-proof and does not shrink.

SERAFLEX® 100% PTT (polytrimethylene terephthalate)

Fantastic - elastic

SERAFLEX is the perfect sewing thread for highly elastic seams on all stretchy fabrics. It makes especially the straight stitch extremely stretchable, in the best case even a doubling of the seam elasticity can be achieved compared to seams with conventional sewing threads. Due to its innovative Raw material PTT (37% renewable Raw material) an elongation of approx. 65% is achieved. Due to its extremely elastic properties, SERAFLEX is primarily used for clothing, such as outdoor and sportswear, women's, men's and children's clothing, lingerie, and underwear. SERAFLEX should be used both as needle and bobbin thread and exclusively in straight stitch with the thread tension set as loose as possible.

SILK-FINISH COTTON 28 100% mercerized cotton

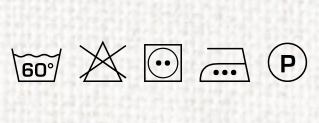

Accentuating seams

Decorative, high quality, and with a precious gloss - our sewing thread SILK-FINISH COTTON 28 is the perfect companion for all decorative seams. SILK-FINISH COTTON 28 consists of 100% long-staple Egyptian cotton. That makes it ideal for setting special highlights: Whether for topstitching, hand quilting, or hand embroidery, the thick and subtle shiny sewing thread gives decorative seams, decorative stitches, and appliqué a particularly beautiful effect. The strong sewing thread also masters buttonholes and denim hems with ease. During production, the sewing thread undergoes a mercerization process. This technology makes the sewing thread more tearproof, low-shrink, and iron-proof. Our special dyeing technique also gives the thread the highest level of colorfastness.

SILK-FINISH COTTON 40 100% mercerized cotton

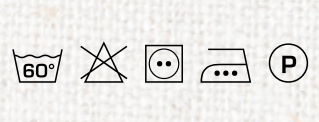

Perfect for patchwork

SILK-FINISH COTTON 40 is made from 100% long-staple Egyptian cotton and is excellently suited for patchwork and quilting projects. Since this thread is somewhat thicker, you can achieve particularly beautiful decorative seams and impressive embroidery patterns with it. However, those patterns should not be too densely digitized. A mercerization process during the thread production makes the sewing thread more tearproof, low-shrink, and iron-proof. That is what makes it so fabulously versatile. Do not hesitate to use SILK-FINISH COTTON 40 also for sewing. Cross-stitch patterns also turn out extremely well with this sewing thread. You can even try the thread as a looper when serging: In combination with SERACOR as needle thread, you can expect great effects.

SILK-FINISH COTTON (MULTI) 50 100% mercerized cotton

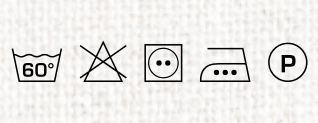

The all-rounder among the cotton threads

SILK-FINISH COTTON (MULTI) 50 is Mettler's cotton all-rounder and is ideal for quilting, sewing, and matt embroidery. In addition, great decorative effects can be achieved on serger seams with this thread as a bobbin thread and SERACOR as a needle thread. The thread impresses with a luxuriously soft effect and a supple feel. SILK-FINISH COTTON (MULTI) 50 is available in a wide range of colors and different make-ups, with the large make-up being ideal for longarm quilting. The multicolor thread gives your creations a very special effect. A mercerization process during the thread production makes the sewing thread more tearproof, low-shrink, and iron-proof.

SILK-FINISH COTTON 60 100% mercerized cotton

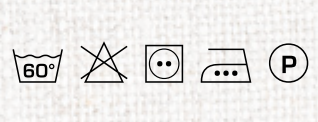

The cotton thread for the finest creations

SILK-FINISH COTTON 60 is the perfect thread for quilting and creating matt embroideries. It can be perfectly processed on batiste, tulle, cotton, linen, terry, and many other fabrics. Thanks to this high-quality cotton thread, both fine and full embroidery motifs and decorative seams become personal masterpieces. SILK-FINISH COTTON 60 consists of 100% long-staple Egyptian cotton that has a smooth and silk-like feel. The special dyeing technique makes SILK-FINISH COTTON 60 particularly colorfast for years. The large make-up is ideal for longarm quilting.

POLY SHEEN® (MULTI) 100% trilobal polyester

Shiny appearance for your embroideries

POLY SHEEN (MULTI) is the classic among Mettler embroidery threads. Thanks to its enormously high tensile strength and abrasion resistance, this thread is excellent for embroidery. The gloss is particularly beautiful with POLY SHEEN (MULTI) - the trilobal filament cross-section of the thread enlarges the thread surface and thus enables a higher light reflection than with conventional embroidery and decorative sewing threads. The color brilliance is maintained for years even under heavy use such as chlorine bleaching. POLY SHEEN (MULTI) can be used universally and is unbeatable on heavily used textiles such as sports and leisurewear, children's, leather, work clothing, denim, and terry cloth.

METALLIC 55% polyester. 45% polyamide

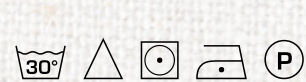

Conjuring up brilliant effects

METALLIC is the perfect thread for impressive special effects. It gives all creations a special touch and by its intense interplay of light and shade, an eye-catching 3D effect occurs. This metallic-looking thread is especially suited for stylish embroidery, impressive decorative stitching, and elegant badges. As METALLIC is a wrapped yarn, its processing speed is a bit lower compared to conventional thread.

DENIM DOC 70% polyester. 30% cotton

Makes jeans look better

Thanks to its perfect combination of polyester core and cotton covering, DENIM DOC is the perfect thread for denim seams and darning. Closing, topstitching, and serger seams succeed particularly well with it. Excellent results can also be achieved when DENIM DOC is used as needle thread for matt embroideries.

POLY GLOW 50% PBT (polybutylene terephthalate). 50% PP (polypropylene)

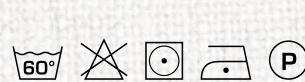

A highlight in the dark

POLY GLOW is a phosphorescent, washable embroidery thread, which stores both UV and artificial light, making embroideries and seams glow in the dark. The thread is great for creating extraordinary effects on sportswear, casual wear, children's clothing, bags, and satchels, as well as for embroidering logos and lettering.

BOBBINETTE® 100% polyester

One of the best among many

BOBBINETTE is the perfect bobbin thread for all embroideries. Especially as embroidery bobbin thread in combination with the embroidery thread POLY SHEEN from Mettler or with the Amann Group embroidery thread ISACORD it contributes significantly to an optimal embroidery picture. BOBBINETTE is also ideal for fine seams in delicate and pucker-prone fabrics as well as for high-quality overedging.

SERACOR 100% polyester

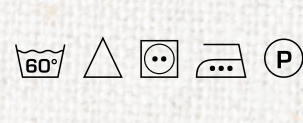

The universal serger thread

SERACOR is the all-rounder among the Mettler serger threads and masters all classic serging applications with ease. It can be used throughout the entire serging range and has excellent seam elasticity with a filigree look. SERACOR has a strong core, around which supple fibers are spun. This construction gives the thread its matt appearance. Ideal for borders and all classic serging tasks, even on the most demanding multiple serging machines. The 1000m snap-lock Miniking spool provides a safe, clean and practical storage place. The snap groove holds the thread in place when not in use.

1228			2500 m / 2734 yds	50				

SERALENE 100% polyester

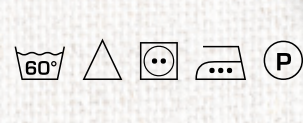

For finest serging work

SERALENE is excellent for fine and barely visible seams on light fabrics. The thread is ideal as needle and bobbin thread for high-quality serging, blindstitch and padding. SERALENE amazes with excellent and trouble-free sewability, even on demanding multiple serging machines. Even monogram embroideries and fine embroidery details succeed very well with SERALENE. SERALENE does not shrink and is easy to use. The snap-lock Miniking spool provides a safe, clean and practical storage place. The snap groove holds the thread in place when not in use.

SERAFLOCK 100% polyester, bulk yarn

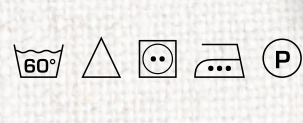

For supple seams at every movement

SERAFLOCK is the bulky serging thread for serger and closing seams in stretchy fabrics as well as in warp- and weft-knitted fabrics. Thanks to its bulky thread structure, SERAFLOCK is excellent for covering open seam edges of slightly fraying materials well and securely. This bulk yarn is excellent for wool and elastic seams in knitted fabrics such as lingerie, gymnastic, or swimwear. SERAFLOCK can be sewn without interference, even on demanding multiple serging machines. SERAFLOCK does not shrink and is easy to use. The snap-lock Miniking spool provides a safe, clean and practical storage place. The snap groove holds the thread in place when not in use.

AMANDA® 100% silk

For the finest silk creations

The high-quality sewing thread AMANDA is ideally suited for sewing work on silk fabrics as well as for decorative hand and machine embroidery on silk materials. Thanks to its noble and soft look, AMANDA is especially suitable for precious sewing works with a noble sheen.

Application recommendation

ELASTIC 62% elastane. 38% polyester

Goes with every move

In the sewing sector, the highly stretchable ELASTIC thread is particularly well suited for smocking work for both firm and elastic fabrics, as well as for ruched hems. ELASTIC should be used exclusively as a bobbin thread on the sewing machine. Here, the intensity of the crimp can be regulated via the bobbin thread tension. Tacking at the beginning and end of the seam is absolutely necessary. It is also recommended to use relatively long backstitches.

TRANSFIL® 100% transparent polyamide

Strong hold in the background

The TRANSFIL thread is recommended for all works where the seam should remain invisible. It can be used as a bobbin thread and as a needle thread. The 1000m length was created especially for the quilting customer so that the thread will last long enough for elaborate quilt designs.

BASTING THREAD “FADENSCHLAG” 100% cotton

The first class basting thread

“Fadenschlag” is made of 100% natural cotton and helps sewing beginners and professionals alike to ensure that nothing moves out of place. Basted garments can be tried on in advance and corrected if necessary. Unlike trying on clothes that are fastened with pins, basted clothes hold better and there is no risk of getting hurt by the pins. The Mettler basting thread is available in four different colors, making it recognizable on all fabrics. This is enormously important for basting threads because they must be removed after the final sewing. .

Quality

THAT IMPRESSES.

Our broad, high-quality assortment is the result of our years of experience and continuously developing thread competence within the AMANN Group. The high demands in the industrial area also apply to the threads under the Mettler brand. Each of our products is always a clear commitment to quality and environmental compatibility. We are compliant with quality, safety and environmental protection requirements, which are attested through strict ISO certifications.

As a global player, we believe in taking responsibility. That is why we cooperate closely with our suppliers to put all necessary safety measures in place and to guarantee the safety of our chemicals according to the EU regulation REACH. STANDARD 100 by OEKO-TEX® identifies the environmental compatibility of all Mettler products.
